

PG-DASSD: SDLC, Cryptography, Software Security, Android, Java, SNP, Python & ML

Post Graduate Diploma in **Advanced Secure Software Development (PG-DASSD)**

The PG-DASSD course is dedicated to addressing security needs in contemporary software development, offering a balanced focus on programming fundamentals, and emerging technologies like machine learning & cyber security.

Course Modules

- Secure Programming & Secure SDLC
- Data Structures & Algorithms
- Linux System Programming
- Cryptography & Network Security Essentials
- Software Security
- Secure Network Programming
- Secure Java Programming
- Secure Android Programming & Analysis
- Python and Machine Learning for Cyber Security
- Aptitude & Effective Communication
- Project & Seminar

Course Highlights

- Well established courses with excellent placement records.
- 24-week full-time courses with 900 hours' theory + lab + project.
- 6-8 hours per day theory + lab sessions on 6 days a week in most centres.
- Continuous lab and internal assessments during the course.
- Centralised course-end theory exams across all centres.
- Courses designed and developed in consultation with the domain experts in C-DAC, academia and ICT industry.
- Expert faculty from C-DAC and ICT industry with widespread domain knowledge.
- Tutorials, hands-on and projects relevant to the standards of the ICT industry.
- Special training on aptitude, effective communication and interview skills.
