

MALWARE NIVARAK

Malware Nivarak addresses the malicious software issue by using application behavior whitelisting. This solution eliminates the need for constantly generating and updating the new malicious software signatures. It helps to detect zero-day attacks, without compromising the system performance or daily updating.

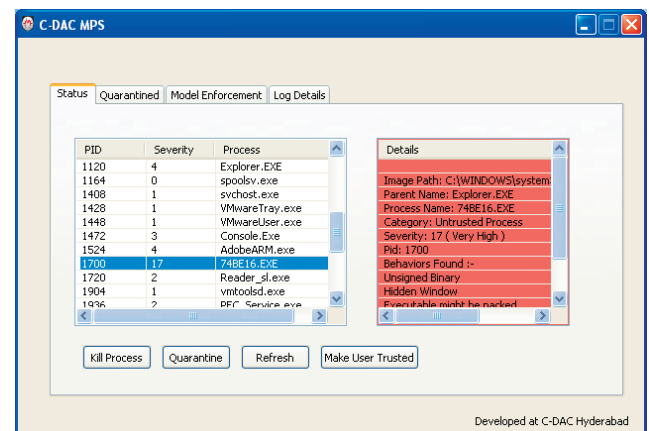

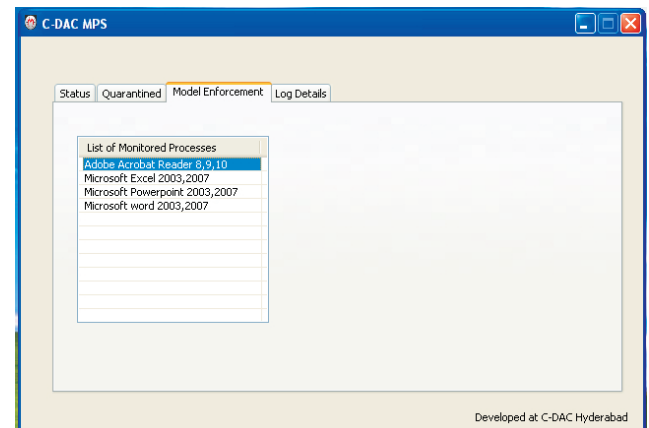

By default, Malware Nivarak is bundled with models of Adobe Acrobat Reader, MS Excel, MS Word, MS Power point. Apart from these applications, one can generate model for any of their applications and enforce them at runtime.

FEATURES

- Learning acceptable behavior of applications
- Verification of application against critical resource access
- Enforcing the model at run time
- Process Execution Control
- Guard from application exploits and implicit malicious activity
- Real Time and automated malware prevention
- Fine grained monitoring of file & registry access
- Co-existence with other antivirus solutions
- Prevents zero-day attacks

SYSTEM REQUIREMENTS:

Windows XP SP3, Vista SP2 and Windows 7 SP1

प्रगत संगणन विकास केन्द्र

CENTRE FOR DEVELOPMENT OF ADVANCED COMPUTING

संचार एवं सूचना प्रौद्योगिकी मंत्रालय की वैज्ञानिक संस्था, भारत सरकार

A Scientific Society of the Ministry of Communications and Information Technology, Government of India
